

FIG. 1

FIG. 2

FIG. 3

[illegible]

The diagram illustrates a complex fluid control system with three parallel stages, labeled A, B, and C. The system includes three pumps (2, 5, 8) and three sets of valves (12A, 12B, 12C). The flow path starts at inlet 1, passes through pump 2, and then splits into three parallel paths. Each path contains a valve (12A, 12B, 12C) and a pump (2, 5, 8). The flow then passes through a series of valves (19A, 19B, 19C) and a final discharge valve (24). The diagram also shows a common discharge line 24 and a return line 25. The system is controlled by a series of valves (13A, 13B, 13C) and a series of pumps (15A, 15B, 15C). The diagram is labeled with various components and flow lines, including 1, 2, 3, 4, 5, 6, 8, 9, 10, 12A, 12B, 12C, 13A, 13B, 13C, 14A, 14B, 14C, 15A, 15B, 15C, 16A, 16B, 16C, 17, 18, 18A, 18B, 18C, 18D, 18E, 18F, 19A, 19B, 19C, 21A, 21B, 21C, 23, 24, 25, 26, 27, and 28.
